

**SALES TRANSACTIONS FOR TRANSFER  
OF AGRICULTURAL PRODUCTS**

**ABSTRACT OF THE DISCLOSURE**

5           A method for transacting exchanges of agricultural products, such as crop output,  
livestock, and animal produce, includes setting a first price for a first quantity of  
agricultural product based on an average price observed during a period of time and either  
a premium or discount to the average price. A second price is set for a second quantity of  
an agricultural product based on a price determined at a future date. The second price  
10 does not exceed a maximum price in the event a premium applies to the first quantity, or  
a minimum price in the event a discount applies to the first quantity. The first quantity  
and the second quantity are delivered from a seller to a buyer, and the seller is paid a sum  
based on the first price, the premium or discount, as applicable, and the second price.
